

PRESS RELEASE

Date of release: June 21st, 2008

CASINO TECHNOLOGY IN LATIN AMERICA

“The FADJA exhibition in Bogotá, Colombia in the beginning of the year became the most successful ever for Casino Technology in the region.” - said Casino Technology Sales manager for Latin America Nevena Aleksieva. Many interviews were given to the newspapers regarding the new opportunities for Casino Technology in Latin America. “Our stand was visited by many customers and partners. Ten of our GEMINI slot machines and Jackpot systems were left in Colombia to be installed in casinos of local operators. We received an order for 50 more GEMINI slot machines for a customer from Venezuela. Many clients and partners have expressed serious interest visiting our stand. We expect that operators will be happy with the performance of our games and further purchases will follow” – continued Nevena Aleksieva.

Casino Technology completed the homologation of GEMINI machines and Pluto- based games in Peru and the same procedure is to be taken for Apollo and G-Club series as well as for the PC-based games. GLI have certified Casino Technology’s latest releases – GOLDEN BIRD, CARNIVAL KING, AZTEC RETURNS, COLUMBUS TREASURE and OCEAN DELIGHT video slots as well as the whole MULTI GEMINI series, which were very well accepted at ELA Mexico and SAGSE in Panama. For the exhibition in Mexico City next year, Casino Technology will have a bigger stand on a better floor location and is planning to prepare a new cabinet for Class 2 category, especially designed for the Mexican market.

“We are very happy to welcome an addition to our LA team, based in Lima, Peru. Georges Didier, is our new sales representative responsible for the Peruvian market. With this news are optimistic about the forthcoming Peru Gaming Show in August and SAGSE, Argentina in October, which is traditionally the biggest show in the whole Latin American market.”
