

PRESS RELEASE

Date of release: March 21st, 2007

Multi Gemini - Casino Technology further develops their new multi game range

Casino Technology has established itself as a renowned producer of multi games, whose popular products Mega Jack and Gamopolis have achieved continued success. At the beginning of 2007 Casino Technology launched their new series, Multi Gemini.

The concept behind this product is to provide operators with a multi game mix of the best current video-slot performers from Casino Technology within a single unit. These individual games have had resounding success during the past 10 months, and are now offered in a variety of different configurations. With Multi Gemini Casino Technology aim to offer operators more options in managing their slot floors, along with flexible space saving solutions and more diversity for players.

Currently available are Multi Gemini 1, 2, and 3. This selection includes both proven performance games like Golden Elephant, Silk Quest, Purple Hot, Milady and Lucky Driver, along with some recent hits like Gold of Babylon III, New Love Story and Driver Returns, the latter developed as remakes of classic games, with completely new mathematics and improved bonus systems. All these games now feature free spin bonuses, with growing multipliers as well as interactive multi level bonuses or classic collect credit scheme, designed to increase players winning chances and excitement. The Multi Gemini from Casino Technology caters for all player levels from low-denomination to VIP.

The new multi-game mix boasts all the advanced features, which Casino Technology has implemented into the GEMINI series of games, including second screen feature, user-friendly interface with built-in options, multi-denomination, SAS compatibility, cashless system and wide variety of jackpots and is available in the hi-end dual monitor luxury GEMINI cabinet as well as in the single monitor APOLLO cabinet.

Casino Technology will be demonstrating Multi Gemini 1, 2 and 3 at the casino industry shows in April – World of Entertainment - Prague, and FADJA - Bogotá. Meanwhile the Casino Technology design team continues to develop new versions of the multi game, to provide a larger variety of combinations, from which clients may choose according to their requirements.
